Grade Boundaries

June 2026

Component Assessments for BTEC Level 1/Level 2 Tech
Awards (2022)

Understanding the internal assessment grade boundaries for BTEC Level 1/Level 2 Tech Awards 2022 suite

This document shows the grade boundaries for our BTEC L1/L2 Tech Awards 2022 suite. It shows the grade boundaries both for components that are internally assessed and externally moderated and for externally assessed components. Some components are only available in the June assessment series.

For individual components, maximum marks and boundaries are shown for both the raw and the uniform mark scale (UMS).

The minimum uniform marks (UMS) for a qualification grade of a subject can be found in the **Specification** under **Section 8 – Final grading and awarding**.

Candidate results, Broadsheet and Statement of Results, can be downloaded from Edexcel Online. Results will also be sent to centres via the EDI system automatically on results day.

Definition of terms

Here, for the internal components, raw mark refers to the final mark awarded for an assessment after any adjustment is made in the moderation process or in relation to a special consideration application. Raw mark for the external components is the mark awarded by the examiner or in relation to a special-considerations application. Raw mark scores will be available to centres via the EDI system.

A grade boundary is the minimum mark at which a grade can be achieved. For example, if the grade boundary for a Level 2 Distinction (D2) is 50, then 50 is the minimum mark at which a Level 2 Distinction (D2) can be achieved. A mark of 49 would therefore be a Level 2 Merit (M2).

Raw marks are converted to UMS (the Uniform Mark Scale). This is because raw mark grade boundaries may change from series to series to take into account variations in the difficulty of the assessments. A Certifying Statement of Provisional Results (results slip) will always show the UMS for these qualifications.

Animal Care
