We have to be very careful when interpreting this data as any obvious differences in the performance of disadvantaged and non-disadvantaged students are exaggerated by i) the very high attainment of the vast majority of our students; and ii) the relatively small number of disadvantaged students that make up any cohort at HCCS, e.g. PP students accounted for only 11% of the Year 11 cohort for 2019 to 2020.

The following successes can be attributed, at least in part, to the strategies and interventions in place to support our disadvantaged and vulnerable students:

1. 41.7% of our disadvantaged students achieved a 9-4 grade in English and maths. (The national average for PP 9-4 in English and maths in 2020 was 40.2%).
2. PP P8 has closed between 18/19 to 19/20 going from -0.602 to -0.52
3. PP gap has shrunk from 0.925 in 17/18 to 0.746 in 18/19 to 0.52 in 19/20 = 0.41 over two years

Actions for 2020 to 2021:

1. **Continue with our focus on Quality First Teaching and Quality First Tutoring to ensure that all staff (teachers, leaders and support staff) are targeting the right students for intervention and providing support and/or challenge as appropriate.**
2. **The *Accelerated Reader* programme will be rolled out into Year 9 and ALL PP students (Years 7 to 11) will be tracked through this system to ensure that reading age / literacy skills are optimised for all disadvantaged students.**
3. **The *Accelerated Numeracy* programme will be introduced across Key Stage 3 to ensure that ALL students (and especially PP/disadvantaged students) have the numeracy skills required for success at GCSE and in later life.**
4. **External mentoring programmes will be used to enhance provision for upper-school PP students.**
5. **Targeted support for after school intervention. A total of 3 hours of targeted after school provision.**
6. **Rewards program in order to encourage positive learning habits and attendance.**
